

Patient Care Technician

INDUSTRY FACTS

What does a patient care technician do?

With the ever-increasing demand on the healthcare industry, patient care technicians are a vital part of today's medical workforce.

Under the supervision of doctors, nurses, and other medical professionals, a patient care technician (PCT) helps look after sick and injured patients.

Their primary duties include the following:

- Basic patient care like bathing, feeding, and catheter care
- Acquiring, distributing, and administering patient care supplies
- Collecting laboratory specimens
- Ensuring the cleanliness of patient rooms and conducting safety checks
- Monitoring and recording changes in patient health and vital signs
- Performing EKG and phlebotomy procedures

Where do they work?

Patient care technicians have many options available for work location and environment. Most PCTs work in a hospital, home care agency, or a nursing home, while others work in doctors' offices, clinics, or rehabilitation centers. Additional job placement opportunities can be found through specialized training, including dialysis, emergency room, and ICU specialization.

How much do they earn?

Patient care technician salaries can vary greatly depending on location and employer. However, the national average salary for patient care technicians is \$35,428.*

How's the job outlook?

There's never been a better time to start your career as a patient care technician. As the national population continues to age, more and more assistants will be needed to perform routine administrative and clinical duties so there's plenty of opportunity to find a rewarding career you love.

PROGRAM DETAILS

Improve Your Life

When it comes to career training, you'll find a lot of posers out there. Con artists that'll try to impress you with fancy hyperbole. But through all the noise, the distinct sound of success can be heard. Your success. All it takes is a little push. A nudge in the right direction—and your whole life could change. New doors opened. New worlds discovered. And new opportunities explored.

Prepare For A Better Job

Train affordably without sacrificing quality. This program's comprehensive training was developed by industry professionals with years of experience – specifically designed to help you prepare for the Certified Patient Care Technician/Assistant (CPCT/A), Certified Phlebotomy Technician (CPT), and Certified EKG Technician (CET) certification exams.

Learn Your Way

With online training, you can absorb more knowledge and learn more skills—fast.

- Study on a schedule that fits your life
- Progress at a pace that matches your learning style
- Adjust the time and effort you devote to your coursework each day

Receive Coaching and Guidance

When you train with CareerStep, we back you every step of the way—from sign-up through course completion.

- Learner support
- Technical support
- Career support

Get Certified

We'll prepare you to take nationally recognized exams so you can explore greater opportunities in your area.

- **Patient Care Technician/Assistant (CPCT/A)**
